

Quality and Food Safety Policy

TMI maintains Quality and Food Safety practices to ensure that all types of hazards, from the purchasing of raw materials to the dispatch of finished products, are controlled and minimized to the best of our ability. We are committed to:

- Identifying and fulfilling the needs and expectations of our valued interested parties by providing quality and hygienic products.
- Continually improving our product quality, operational effectiveness, infrastructure, and management system.
- Maintaining a hygienic work environment through periodic reviews of hazard analysis and objectives.
- Ensuring that our product and operational activities comply with all applicable international and national laws and regulations, as well as customer requirements.
- Showing leadership, commitment, and bearing the responsibility for establishing, implementing, integrating, and maintaining the Quality and Food Safety Management System.
- Providing sufficient resources to achieve Quality and Food Safety Systems by offering training and awareness to our employees.
- Identifying risks and opportunities related to quality and food safety aspects for the improvement of our business.
- Communicating this policy with all interested parties (Internally and Externally), also implementing and maintaining this policy at each level of our organization.
